An I/A Game Changer

“CapsuleGuard® has been a game-changer for me in the art of removing cortical material; there is no doubt that, at times, it is more arduous to remove cortex than the nucleus especially with tougher cataracts, smaller pupils, and flimsy posterior capsules. Ever since implementing the CapsuleGuard® as part

of my standard surgical regimen, I feel more confident going after the cortex in all my cases! Its silicone and disposable nature are attributes that I have come to enjoy. Confidence and dependability are things we all yearn for and the CapsuleGuard® provides just that.”

Cortex Removal

Viscoelastic Removal

Excellent Visualization
