

Comfort and performance in a disposable instrument?

PRECISELY.

The reimagined Pinnacle 360 was designed to unlock the potential held within every surgeon's hands. We reengineered the actuator to consistently provide a smooth, responsive and precise performance. Additionally, the instrument's sleek, ergonomic contours fit in hands of all types and sizes. Our glare-free tips undergo a patented fine-wire process to create micro serrated edges that promote traction.

- Reusable quality in a disposable instrument
- Extensive selection of glare-free tips
- Ergonomic 360 degree actuation
- Color-coded by gauge

pinnacle 360™

Scleral Fixation Forceps

25G 11.46.25PIN

- Curved shaft enables anterior access from the pars plana
- Serrated grasping platform engages sutures without shredding
- 25ga cannula compatible with suture engaged
- Glare reducing finish for better visualization

Reddy End Grasping Forceps

23G 39.32.23PIN

25G 39.32.25PIN

- External surfaces of the distal tip are micro serrated to assist in edge identification and initiate membrane peels
- Tapered tip provides a precise grasp
- Long, micro serrated grasping platform to maintain purchase of ILM/ERM
- Glare reducing finish for better visualization
